

TECHNICAL B+B		BASIC (0 - 4)	EFFICIENT (5 - 7)	THOROUGH (8 – 10)
WORK SYSTEMS & PLANNING	SITE ASSESSMENT	A brief walk around the site to identify any visual hazards present but fails to use site id card or victim location markings. Fail to assess access/egress routes.	Good examination of site including identification of all under and overhead hazards. Identifies access points. Identifies access/egress routes. Relays some of this information to the team.	Thorough examination of site. Identifies all under/overhead hazards. Identifies access/egress routes and uses cordons to identify work areas. Use of site id card plus victim location marking Fully briefs the team on outcomes.
	TEAM BRIEFING/TASK DELEGATION	Insufficient information gathered or given to the team. Little or no delegation of roles. Little or no mention of any hazards identified.	A brief explanation of the lifting plan given to the team. Various roles delegated. A safety brief given to the whole team.	A detailed but concise explanation of the lifting plan given to the whole team. All members delegated specific roles and given the opportunity to ask any questions to confirm their roles. A full safety brief given.
	APPROPRIATE BREECHING SURVEY AND PLAN	Insufficient account of structural integrity or possible location of casualty. Ineffective/incorrect breach type. No Breach Preparation (mark up following rebar detection).	Account taken of Structural integrity and location of casualty taken into account. Correct breach method chosen but insufficient preparation carried out.	Full account of structural integrity, with casualty location identified. Correct breach method chosen with full preparation carried out.
EQUIPMENT PROFICIENCY	EQUIPMENT SELECTION	Inefficient selection of correct equipment. Fails to ensure that the right tools are selected	Identifies correct equipment for plan A and ensures the right tools are selected	Quickly identifies correct equipment. Ensures that the right tools are selected and understands the correct tool sequence is ready for the next phase and safety factors required. Ensures equipment available for plan B if required.
	EQUIPMENT ASSEMBLY	Equipment selected is incorrectly assembled, not used as per SOPs or potentially subjected to incorrect assembly.	Equipment selected is assembled correctly in a timely and efficient manner. Equipment is assembled as per the SOPs.	Equipment selected is assembled quickly and efficiently as per SOPs. Double checked by another team member and the team leader informed of this. Equipment for plan B is assembled if time permits or placed in an identifiable position in the equipment dump.
	CORRECT B&B TOOL OPERATION & TECHNIQUES	Chosen tools do not match method of breach required in accordance with structural integrity, techniques are not efficient and safe and crew rotation not considered. Not considering the correct tool operations sequence	Chosen tools match method of breach required in line with structural integrity but either techniques are not efficient and safe or crew rotation not considered. Uses the correct tool operations sequence	Chosen tools match method of breach required in line with structural integrity , efficient techniques and safe use demonstrated with crew rotation at appropriate intervals Pre-plans the tool operation sequence
SAFETY CONSIDERATIONS	SAFE TOOL USE AND SAFETY CONSIDERATIONS	Tools used in an unsafe manner or position leading to potential safety issues throughout scenario.	Tool use safe for majority of scenarios with minor issues on occasions.	Tools used Safely consistently.
	WORKSPACE MANAGEMENT	Poorly managed workspace in relation to equipment or debris.	Work space managed well with minor infringements in relation to equipment or debris	Safe, efficient and effective management of workspace and tools at all times during scenario.
	CRITICAL WARNINGS GIVEN AND ADHERED TO	No warnings given for hazards or tool operations given throughout scenario	Some warnings for hazards or tool operations given and acknowledged but not consistent throughout scenario,	All warnings for tool operations and hazards given and acknowledged throughout whole scenario
	HAZARD CONSIDERATION	Hazards to tool use not considered /identified or acted on. Debris not considered or managed.	Some attempts to Identify hazard to tool use carried out with technical equipment but with on minimal management of debris demonstrated.	All hazards for tool operations considered/identified with technical equipment and actioned. Debris hazards considered and acted on.
TEAMWORK & EFFICIENCY	PRE-PLANNING AND TASK PREPARATION	Technical personnel unsure of role or assigned tasks, demonstrating limited task preparation.	Technical personnel demonstrated full understanding of objectives, which lead to some pre-planning and task	Technical personnel fully proficient about role/function which leads to full pre-planning and task preparation.
	WELL BALANCED TEAM WORK WITH SIMULTANEOUS ACTIVITY	Technical personnel work as individuals or demonstrate poor co-ordination and communication with limited simultaneous activity.	Technical personnel demonstrate good co-ordination and communication with some simultaneous activity.	Technical personnel demonstrate full co-ordination and excellent communication with simultaneous activity throughout scenario.
	GOOD PROGRESSION ACHIEVED	Little progression towards the objective achieved.	Time reasonably spent to accomplish tasks by tech personnel with completion of majority of objectives.	Efficient, controlled and safe progression of plan. Achieving all of objectives making best of available time.
	MAINTAINS APPROPRIATE PPE WHEN OPERATING EQUIPMENT	Personnel fail to demonstrate correct procedures in relation to tool safety and PPE.	Good tool safety and appropriate PPE use demonstrated the majority of time with minimal lapses and issues.	Technical personnel provide an excellent demonstration of tool use with PPE at all times.
